SUBJECT INDEX

Ability of First Graders from the Science Curriculum Improvement Study Program to Describe an Object By Its Properties, An Examination of the, Leslie R. Allen, 61

Another Look at the Relationship Between Frequency of Testing and Learning, Janice J. Monk and William M. Stallings, 183

Applying the Systems-Approach to Curriculum Development in the Science Classroom, John M. Boblick, 103

Assimilating New Curriculum Materials: An Illustrated Suggestion, Harry V. Scott, 151

Broader Base for Science Teaching, A, James Joseph Gallagher, 329

Case for Oceanography at the Inland School, A, Patricia S. Charlier and Roger H. Charlier, 15

Challenge of Anti-Science, The, Hy Ruchlis, 215

Characteristics of Best and Worst College Teachers, Charles M. Bridges, William B. Ware, Bob Burton, and Gordon Greenwood, 545

Chemical Economics, Industrial Chemistry, and Chemical Education, Karlheinz K. Brandes and James R. Rinehart, 69

Cognitive Subsumption in the Life Sciences, A Study of, David J. Kuhn and Joseph D. Novak, 309

Collaborative Practices Between Elementray School Districts and a College in Retraining Teachers for Quality Science Education, Edith M. Selberg and Kenneth Peterson, 115

Comparing Instructional Methods in the Presence of a Concomitant Variable, Joe H. Ward, Jr. and Ann Howe, 227

Comparison of Cognitive and Affective Gains Between Independent Study, Small-Group Discussion, and Large-Group Presentation in High School Biology, William E. Hug, 241

Comparative Effects of Three Seventh-Grade Science Programs with Different Laboratory Materials, David R. Stronck, 125

Computer-Assisted Instruction in Undergraduate Organic Chemistry: An Evaluation of Selected Programs, George H. Culp and Sam J. Castleberry, 423

Computer-Based Simulation of Laboratory Problems in Qualititative Chemical Analysis, T. T. Hollen, Jr., C. Victor Bunderson, and J. L. Dunham, 131

Concept Improvement of Junior High School Students Viewing MPATI Telecasts with and without Supplementary Aids, The Study of, Kenneth F. Jerkins and Joseph D. Novak, 21

Conservation of Weight Across Different Materials by Lebanese School Children in Beirut, George I. Za'rour, 387

Conservation 70's: A Concept for Environmental Action, Lyman Rogers, 57

Content-Learning in a Process-Oriented Curriculum: Some Aspects of B.S.C.S. Biology in Israel, E. Jungwirth, 85

Creativity in Science Teaching, Nathan S. Washton, 147

Developing Creativity through Inquiry, Frank Lynn Bills, 417

Distance, Weight, Height, Area and Temperature Percepts of University Students, Malcolm Swan and Orville Jones, 353

Effect of an In-Service Science Workshop on the Ability of Teachers to Use the

Techniques of Inquiry, Kenneth D. George and Miles A. Nelson, 163
Effective, Self-Satisfying Modes of Teaching, Richard D. Kellough, 457
Effectiveness of Teacher Education Programs in the Sciences, David E. Newton, 431
Effects of Method of Instruction and Frequency of Response on Criterion Performance, Cornelius J. Troost and Stanley Morris, 379
Effects of Selected Teaching Methods on Creative Thinking, Self-Evaluation, and Achievement of Students Enrolled in an Elementary Science Education Methods Course, Alan J. McCormack, 301
Effects of Set Induction upon Pupil Achievement Retention and Assessment of Effective Teaching in Units on Respiration and Circulation in the BSCS Curricula, Robert F. Schuck, 403
Electronic Response System in Teaching Biology, The Use of An, William C. Bessler and Jerry J. Nisbet, 275
ERIC SMAC Compiles and Disseminates Environmental Education Related Materials, Cassandra S. Balthaser, 263
Evaluation of Teachers by Students: Let Us Comprehend the Nature of This Demand, The, Richard D. Kellough, 439
Fostering Curricular Change, Ronald D. Anderson, 137
Handmade versus Commercial Equipment in Elementary School Science: An Experimental Study, Robert L. Shrigley, 361
Highlights from a Survey of the Chemistry Curriculum in Kansas High Schools, 1969-1970, Parley Rogers, 471
Individualized Science: Relevance for the 1970's, Leopold E. Klopfer, 441
Inexpensive Laboratory on Environment for College Science Departments, An, Edward Saiff, 221
Inner City Child: An Attempt to Improve His Science Problem Solving Skills, The, Kenneth D. George and Maureen A. Dietz, 527
In-Service Training in Science Education Methods for Elementary, Dormalee Lindberg, 465
Interpretation of Research Findings in Terms of Ausubel's Theory and Implications for Science Education, Joseph D. Novak, Donald G. Ring, and Pinchas Tamir, 483
Intrafactor Transfer in Second Grade Children, Ronald Raven and Herbert Strubing, 31
Investigation of the Effect of Field Studies in Science on the Learning of the Methodology of Science, An, David M. Riban and David B. Koval, 291
Lost Dimension in Elementary School Science, A, Ann Howe, 143
Multi-Media and Student Learning, Francis X. Finigan, 45
New Era in Teacher Preparation, A, Alan M. Voelker, 177
New Ideas for Pre-Service Training of Secondary Teachers of Science, Verne A. Troxel, 223
On the Logical Analysis of Inquiry, J. W. George Ivany, 347
Operational Model for Individualizing Instruction, An, D. P. Altieri, T. Gadsden, Jr., and V. Allen, 269
Organization and Classification of Behavioral Objectives in Elementary School Science, A Scheme for the, Robert A. Lehman and Edward R. Simco, 371
Physical Science Teachers Grow on Trees, William J. Fitzpatrick, 3
Piaget and the Training of Elementary Science Teachers: Theory into Practice, Alan J. McCormack and Rodger W. Bybee, 233
Planning and Sequence in Outdoor Science Activities, Harry V. Scott, 265
Plea for Honesty in Science Classes, A, Horance MacMahan, Jr., 449
Practice in Critical Reading as a Method to Improve Scientific Writing, W. W. Brandt, 451
Preparing High School Physics Teachers, Commission on College Physics, 249
Preparing Prospective Teachers of Elementary Science: An Appraisal between Prescriptive Involvement and Teaching Behavior, Victor A. Perkes, 295
Preparing Teachers for Curriculum Reform, F. James Rutherford, 555
Pre-Service and In-Service Education of Biology Teachers, Beverly W. Miller, 339
Process Approach to Teaching Science, A, Marshall A. Nay and Associates, 197
Pseudo-Science in Science Education, Michael Martin, The Use of, 53
Psychological Implications of Discovery Learning in Science, Barry A. Kaufman, 73

Regression Analysis of Antecedent Measures of Slow Sections in High School Biology, Alton L. Taylor, 395
Report on Two Courses in Chemistry Taught at Cragin Elementary School, Ennio Bianchi, 5
Science Education and the Humanities, Frank L. Ryan, 189
Science Education for the Mentally Retarded, Lloyd M. Bennett and Kay Downing, 155
Seven Junior High School Curricular Programs: A Critique, Frederick J. Zorn, 541
Some Reflections and Perspectives on the Study of Teaching, Jal S. Parakh, 171
Strategies for Managing Natural Resources through Eco-Action, Nancy Ayers, 533
Survey of Science Education in Selected Secondary Schools of Northern Nigeria, A, Catherine P. Spain, 285
Teaching Science in Africa, Robert L. Shrigley, 209
Thomas Huxley's Contributions to Science Education, Thomas C. Moon, 39
Two Pioneer Programs in Studies of the Future, Henry Winthrop, 573
Use and Evaluation of Selected Industry-Sponsored Publications in Teachings Contemporary Biology, Kenneth F. Jerkins, 477
Wait-Time in College Science Classes, George Moriber, 321
What Price Success, Multi-Level Science, Donald R. Daugs, 569
